

Dynebraid *by Millerson*

UHDWMWPE waxed braided hand stitching thread

Dynebraid is specially developed for hand stitching operations in sails and footwear manufacturing

Properties

- Ultra-high tenacity, waxed UHDWMWPE braid
- 15 times stronger than steel and >4 times stronger than same size polyester braids.
- Perfect UV resistance (22% tenacity loss after 5 years to UV exposure where polyester loses %45)
- Not effected from chemicals, oil, acids and alkaline.
- Premium abrasion resistance
- Softer and lighter than polyester braids

Size-mm	Bobbin Length-mm	Strength kg	Elongation at break (%)
1	500	102	6
1,2	500	155	6
1,4	350	205	6

All sizes are available as naturel white.
